Ideation Phase
Define the Problem Statements

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Title	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Customer Problem Statement Template:

Identify the customer's difficulty while creating or updating an incident. This problem statement focuses on making the Incident form easier to complete and reducing mistakes during data entry.

A clear statement helps the project team understand where users face difficulty, what causes the difficulty, and how it affects incident submission and support activities. The focus is on practical client-side guidance and consistent form behaviour.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Reference: Project-specific problem definition

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow incident requester	Complete and submit an incident with the necessary details.	Some fields are unclear or do not guide me when related values change.	I can enter incomplete or inconsistent information without immediate guidance.	Unsure whether the incident has been entered correctly.
PS-2	An incident support staff member	Receive incidents that contain usable and consistent information.	Submitted records may contain missing details or mismatched priority information.	The form does not consistently prevent avoidable entry mistakes before submission.	That extra time is needed to review and correct incident records.
