Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Incident Creation	Create Incident with Caller, Category, Short Description and Description Validate required details before submission
FR-2	Client Script Validation	Validate form field values using Client Scripts Show error or informational messages for invalid values
FR-3	UI Policy Field Control	Set fields mandatory, visible or read-only by condition Example: Caller, Category, Short Description mandatory
FR-4	Incident State Management	Show or hide fields based on Incident State Example: On Hold Reason becomes visible and mandatory when State is On Hold
FR-5	Assignment and Priority	Assign Incident to Assignment Group and Assigned To Select Impact and Urgency to determine Priority
FR-6	Resolution and Closure	Require Resolution Notes and Close Code to resolve Make fields read-only after Incident is Closed

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The Incident form should be simple and easy for Service Desk Agents and IT Support Agents to use.
NFR-2	**Security**	Only authorized users should be allowed to view or update Incident records according to their roles.
NFR-3	**Reliability**	Client Scripts and UI Policies should work consistently without causing incorrect Incident data.
NFR-4	**Performance**	Client-side validation and field changes should happen quickly without unnecessary delay.
NFR-5	**Availability**	The Incident form and its validation features should be available whenever the ServiceNow system is accessible.
NFR-6	**Maintainability**	Client Scripts and UI Policies should be easy for administrators to test, update and maintain.
