Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Example: Incident Management with Client Script and UI Policy in ServiceNow

Reference: https://docs.servicenow.com/

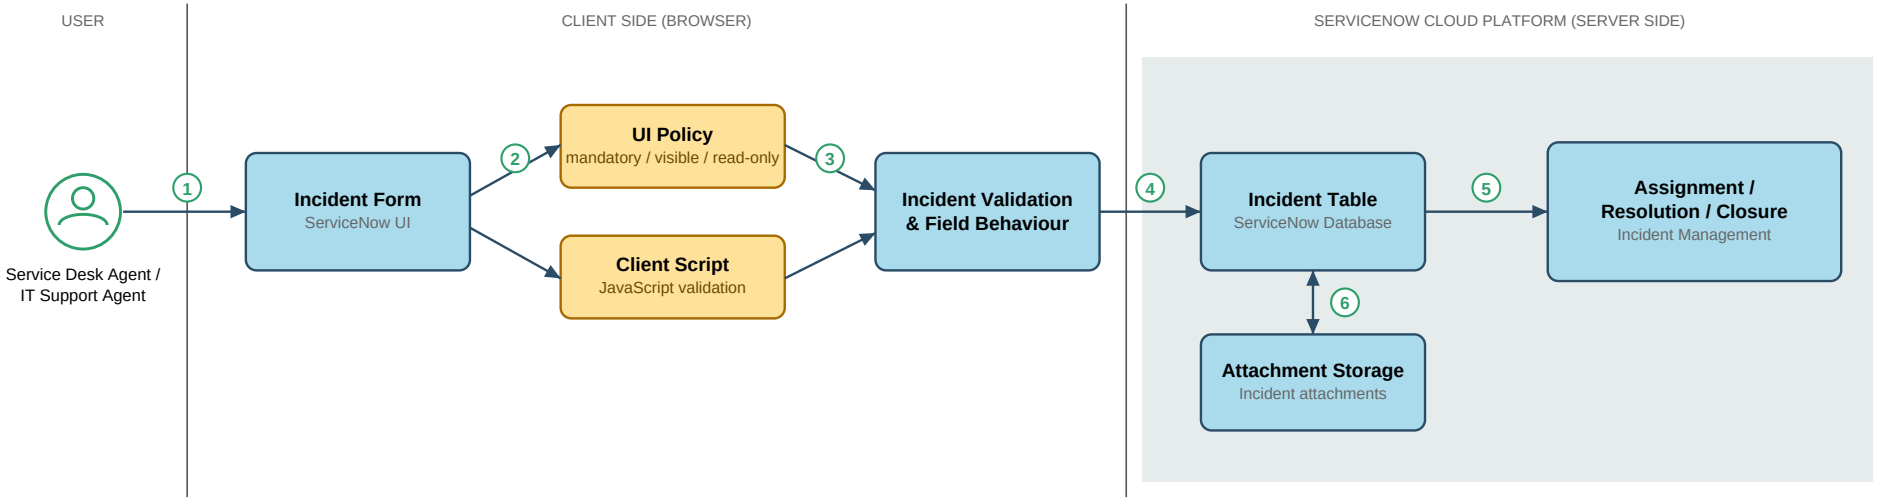

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	ServiceNow Incident Form used to create and update Incidents	ServiceNow UI
2.	Application Logic-1	Client-side field validation	JavaScript Client Script
3.	Application Logic-2	Dynamic field behaviour (mandatory, visible, read-only)	ServiceNow UI Policy
4.	Application Logic-3	Incident workflow and state management	ServiceNow Incident Management
5.	Database	Incident records and field data	ServiceNow Database
6.	Cloud Database	Database service on ServiceNow cloud	ServiceNow Cloud Platform Database
7.	File Storage	Incident attachments	ServiceNow Attachment Storage
8.	External API-1	Not required for the core project	N/A
9.	External API-2	Not required for the core project	N/A
10.	Machine Learning Model	Not required for this project	N/A
11.	Infrastructure (Server / Cloud)	Application deployment and execution Local Server Configuration: Not required Cloud Server Configuration: ServiceNow cloud	ServiceNow Cloud Platform

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	JavaScript-based ServiceNow client scripting	JavaScript
2.	Security Implementations	Role-based access and controlled Incident access	ServiceNow ACLs / User Roles
3.	Scalable Architecture	Modular Incident Management architecture	ServiceNow Platform
4.	Availability	Incident application available through the ServiceNow platform	ServiceNow Cloud
5.	Performance	Client-side validation and dynamic field updates should execute quickly	Client Scripts & UI Policies
