Problem-Solution Fit

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS]

ServiceNow support agents and service desk users who create and update incidents, and ServiceNow administrators who maintain the Incident form.

6. CUSTOMER LIMITATIONS

EG. BUDGET, DEVICES [CL]

Works only on the ServiceNow platform. Needs an instance with Incident Management and a modern browser. Admin or developer role is required to create policies and scripts.

5. AVAILABLE SOLUTIONS

PROS & CONS [AS]

Manual checks by agents: no setup, but slow and error-prone. Server-side Business Rules: strong checks, but they run only after submit. Data Policies: enforce rules, but give less live feedback.

2. PROBLEMS / PAINS

+ ITS FREQUENCY [PR]

Incidents saved with missing or mismatched data (for example Impact and Urgency that disagree), on many tickets every day.

9. PROBLEM ROOT / CAUSE [RC]

The Incident form has no client-side rules, so nothing guides the user or checks values before the record is saved.

7. BEHAVIOR

+ ITS INTENSITY [BE]

Users fill the form quickly and edit values directly in the list, so the same mistakes repeat. High intensity during busy support hours.

3. TRIGGERS TO ACT [TR]

A new incident is raised, or an agent changes Impact or Urgency, or edits a cell in the Incident list just before saving.

10. YOUR SOLUTION [SL]

Client Scripts and UI Policies on the Incident table. The UI Policy “High Impact Control” makes Urgency read-only. The onChange script “Auto set urgency for high impact” sets Urgency to High when Impact is High and shows a message. An onSubmit script validates data before save, and an onCellEdit script checks inline edits in the list.

8. CHANNELS OF BEHAVIOR [CH]

ONLINE

ServiceNow Incident form and Incident list in a web browser.

4. EMOTIONS BEFORE / AFTER [EM]

Before: frustrated by rework. After: confident and guided.

OFFLINE

Phone or walk-in requests entered into ServiceNow by the agent.
