Solution Architecture

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Solution Architecture Diagram:
Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Shows the Incident form and list to the user and collects the field values they enter.	ServiceNow UI, web browser
Platform Web Server	Passes requests between the browser and ServiceNow and manages user sessions. Managed by ServiceNow.	Now Platform (managed)
Client Logic (UI Policy and Client Scripts)	UI Policy “High Impact Control” makes Urgency read-only. onChange sets Urgency to High for High impact. onSubmit validates before save. onCellEdit checks inline list edits.	UI Policy, JavaScript Client Scripts (g_form)
Database	Stores the incident records and the UI Policy and Client Script records.	ServiceNow database (incident, sys_ui_policy, sys_script_client)
