Functional & Performance Testing Report

Incident Management – Client Script & UI Policy

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
INC-CS-01	Caller-based field control	Create an Incident, select a caller, and change the configured field.	Dependent field updates according to the Client Script.	Field updated as configured.	Pass
INC-CS-02	Priority calculation	Set Impact and Urgency values and observe Priority.	Priority changes according to the configured script logic.	Priority changed correctly.	Pass
INC-CS-03	Description validation	Leave the configured field empty or enter an invalid value.	Validation message appears and invalid input is handled.	Validation worked correctly.	Pass
INC-UP-01	Mandatory field control	Select the condition that activates the UI Policy.	Configured field becomes mandatory.	Field became mandatory.	Pass
INC-UP-02	Read-only field control	Set the Incident state to the configured condition.	Configured field becomes read-only.	Field became read-only.	Pass
INC-UP-03	UI Policy reversal	Change the value so the UI Policy condition is false.	Field returns to its normal editable state.	Original state was restored.	Pass
INC-FT-01	Combined configuration	Trigger both Client Script and UI Policy conditions on one Incident.	Both rules work without unwanted conflict.	Both worked correctly.	Pass
INC-FT-02	Save and reopen	Apply conditions, save the Incident, then reopen it.	Record opens correctly with expected behavior.	Record reopened successfully.	Pass
INC-PT-01	Repeated interaction	Change triggering fields several times on the Incident form.	Rules execute consistently without errors.	Rules executed consistently.	Pass
INC-PT-02	Multiple Incident records	Test the configuration on several Incident records.	Behavior remains consistent across records.	Behavior remained consistent.	Pass
INC-PT-03	Response performance	Trigger the configured rules during Incident creation and editing.	Field changes occur promptly without noticeable delay.	Rules responded promptly.	Pass
