Project Development Phase

Model Performance Test

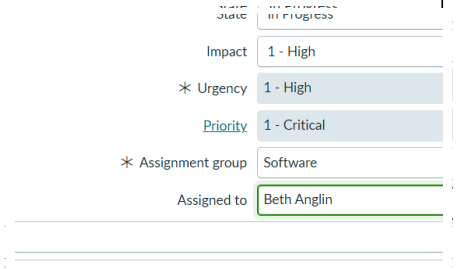

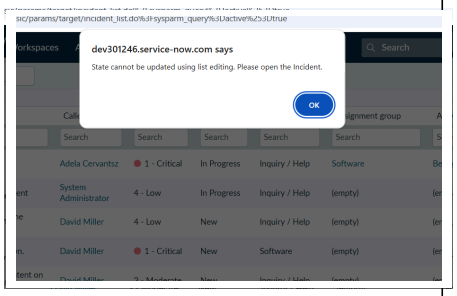

Date	3 October 2026
Team ID	SWTID-2026-3849
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	**Incident form configuration**	The Incident form is displayed with Caller, State, Impact, Priority, Assignment group and other Incident fields for testing.	
2.	**UI Policy - State control**	The Incident State field shows the configured choices used to test state-based field behaviour.	
3.	**Mandatory field validation**	For a High Impact Incident, Assigned To is required and the form displays the validation message when it is empty.	

Model Performance Testing (Continued)

S.No.	Parameter	Values	Screenshot
4.	**Validation after field entry**	After the required value is entered in Assigned To, the Incident form accepts the completed field state.	
5.	**Client-side list editing restriction**	The configured client-side behaviour prevents the State value from being changed directly through list editing and displays a validation alert.	
6.	**Incident list verification**	The Incident list displays the tested records with Number, Priority, State, Assignment group and Assigned to values.
